COVID-19 Vaccine Schedule

COVID-19 vaccines will be distributed within San Benito County through the local health care system, including Public Health. At this time, vaccine supplies are limited, and it is uncertain when vaccines will be available. Phase and Tiers may change at any time based on recommendations by the CDC and California Department of Public Health.

Click [here](#) to view a description of each vaccination phase and tier.

Depending on vaccine production and how quickly other vaccines become available the best estimate of when the general public, who are not otherwise in Phase 1, could receive the vaccine would be Spring 2021, but that may change. For more information about COVID-19 vaccines visit: <https://covid19.ca.gov/vaccines/#When-can-I-get-vaccinated%20>

Condado de San Benito - 7 de Enero de 2021: Servicios de Salud Pública del Condado de San Benito Vacuna COVID-19 plan incluye un cronograma de implementación y un tablero de vacunas COVID-19 para ayudar a los residentes a comprender mejor cuando estarán elegible para la vacuna.

Actualmente, el Condado de San Benito está vacunando la Fase 1A / Niveles 1 a 3 conforme a las Pautas de asignación del Departamento de Salud Publica de California. Las vacunas se están llevando a cabo en asociación con Servicios de Salud Publica, Hazel Hawkins Memorial Hospital y San Benito Health Foundation. Los proveedores se unirán para apoyar aun mas este esfuerzo de vacunación en todo el condado.

Los residentes pueden ver el tablero de vacunas COVID-19 para obtener información sobre el lanzamiento de vacunas. El tablero de vacunas COVID-19 se encuentra en la pagina web sbccovid19.us. Para obtener información adicional sobre COVID-19 local, visite la pagina web sbccovid19.us

Regional Stay at Home Order and Intensive Care Unit Capacity

On December 6, 2020, the Regional Stay at Home Order was put in effect when the ICU capacity dropped below 15% in the region. The Order will be lifted when a region's projected ICU capacity meets or exceeds 15%. Our current regions ICU capacity is at 0%.

The Order highlights some of the following:

- Its purpose is to prevent the overload of California hospitals so that they can continue to serve communities with trauma response, critical care, and medical/surgical care
- It limits mixing of households because we know that is the most common mode of transmission
- The order prohibits private gatherings of any size, close sector operations except for critical infrastructure and retail, and require 100% masking (with certain exceptions as indicated within [guidance for use of face coverings](#)) and physical distancing in all others
- It allows access to (including travel for) critical services and outdoor activities

COVID-19 Workplace Reporting Outbreak Requirements

AB 685 requires that when employers identify 3 or more cases of COVID-19 at a worksite within a 14-day period, they are required to report this to their local health department within 48 hours. This law specifies the type of data that must be reported by the employer and in turn the local health departments reports that data to CDPH. CDPH will begin posting workplace outbreak data by industry/sector pursuant to AB 685 on its website in the coming weeks.

San Benito County Public Health will be rolling out an online workplace outbreak portal that employers can utilize to submit reports of COVID-19 cases in the workplace, including additional resources for employers who are responding to COVID-19 in the workplace. Please call the Public Health Referral line at 831-636-4113 to report any current outbreaks.

Update on Contact Tracing, Case Investigation and Virtual Assistant

Deputy Director Lynn Mello

- Current surge in cases
- Automation of investigations and contact tracing
- Update on contact tracing/case investigations findings
- The COVID-19 Virtual Assistant symptom monitoring service is a safe and confidential COVID-19 symptom check-ins. For your health and safety, you will receive text messages through your local public health department from time-to-time to answer your care-related questions, provide resources, and check in on your symptoms. All information collected is protected and will be used exclusively for public health purposes.
- Communication with the Virtual Assistant Symptom Monitoring System is secure and only accessed via the secure link that is unique to each user. All information shared with the Virtual Assistant is kept confidential and protected by California's strict privacy laws.
- The service is not intended to be a substitute for professional medical advice, diagnosis, or treatment. The personalized secure link provided to you is intended to be used for checking your symptoms only.
- The Virtual Assistant Survey is only available to individuals who are over the age of 18.
- Sample of the process explanation

UC Berkeley CalOSHA/COVID-19
training for Grocery Stores

Training is January 21 or 27 and is at
no cost to participants.

**Implementing Your Required
COVID-19 Protection Plan**

**FREE online training for Grocery Store employers on
implementing your COVID-19 Prevention Plan (CPP),
as required by the new Cal/OSHA standard.**

This free half-day course is specifically designed for managers and supervisors working in grocery stores and other retail settings who are responsible for developing and implementing their COVID-19 Protection Plan. This interactive course will be conducted virtually via Zoom and will focus on the protections necessary for protecting employees from COVID-19 that are required by the new Cal/OSHA COVID-19 Protection standard. You will walk away from this class with the tools necessary for creating, or improving, your required COVID-19 plan. Please register for one of the following dates:

Date: Thursday, January 21	Date: Wednesday, January 27
Time: 9:00 a.m. - 12:30 p.m	Time: 9:00 a.m. - 12:30 p.m
