This quote is based on the phone call and email from The County of San Benito on Thursday, November 2nd, 2017. The client has requested materials to build out an IDF room including one 2-post 19 inch rack for network and telephone equipment and one 24U wall mounted rack for all patch panels and wire managers.

* The Tripp Lite fixed shelf is not needed to support any of the network switches so long as all switches have their corresponding mounting brackets. The fixed shelf is listed as an optional item only for any devices that are not rack mountable or that do not have their mounting brackets.
